A. Pitenis Bros SA is one of the largest production companies in the Greek food industry. The company founded in 1973, as a **delicatessen appetizer industry**. The rapid growth of product demand caused the subsequent transfer of the company into larger facilities, at which time it reinvested in new machinery and production techniques.

By December 1997, the company completed the construction of a new modern **appetizer production plant**, with the acquisition of **14.000m² land area** and **building facilities of 3.000m²** in order to efficiently handle the demands of domestic and international competition. The long-term confidence that consumers have shown in the company's products, as well as its **"family-business"** characteristics, lead to the production of **more than 100 products** by the year 2003. Since day one, the company's business ethic have assured the **high quality standard** of all its products.

In March 2003, the company established **"ArkaFood" - A. Pitenis Bros & Co. LP**, a subsidiary company in Tripoli, for the distribution of products in Peloponnesus. In 2004 it established **"HHBT" Hellenic Hepirus Bio-Technology R&D - A. Pitenis Bros & Co. GP**, a biotechnology Research & Development company, researching the herb synergies on foods, with main aim the penetration of A. Pitenis Bros SA into the Health-Food market. By 2010, the company further facilitated the distribution of goods in Central Macedonia and Attiki by setting up branches in Thessaloniki and Athens. In overall, considering its own distribution network in Western Macedonia and cooperating with more than **80 dealers**, Pitenis supplies over 11.000 outlets worldwide.

The company recently expanded its business in the **"Gourmet"** food market, introducing products of both high quality and nutritional value e.g. **Salad's PREMIUM Line**, **Okeanos EXCLUSIVE** and more. In February 2012 obtains its second Patent concerning a Greek Saffron with Extra Virgin Olive Oil solution with significant increase in antioxidant properties.

Finally, Pitenis is certified by and implements the System Assurance & Quality Management **"ISO - 22000:2005"**, which includes the Hazard Analysis and Critical Control Points **"HACCP"**, the British Retail Consortium **"BRC"** Global Standards for safety and quality products, the International Food Standards **"IFS"** Global Food Safety System, and finally the USA Food & Drug Administration **"FDA"** (on site certification). Recently the company has certified for **"HALAL"** and continues with the necessary processes for **"Kosher"** Lawful Certification.

Pitenis has been awarded the **"Golden European Quality Award"**, in a competition between 15.000 food production companies worldwide, as well as the **"First Nationwide Award"** and the **"First Commendation"** for the **"Business Excellence and Distinction"** issued by EOMMEX SA, and the **"Young Entrepreneur Award"** issued by Kozani's Chamber of Commerce.

THE COMPANY

Personnel

All our company's personnel play an important and decisive part in its success. We encourage personal initiative. Main motive is success in all levels of company's structure. We want our values to characterize our way of doing business. To achieve our aim all our employees are being appointed, trained and get rewarded according to these values.

Products - Innovation

Basic product characteristics are traditional taste and production techniques as well as high nutritional value and quality. We always face our sector's challenges looking for innovative ways to improve our products and services.

Clients

Our aim is to provide our clients with the highest possible level of service and product quality, never forgetting that is the main key to our success. Flexibility, innovative way of doing business and experience, lead to the creation of strong bonds with our clients.

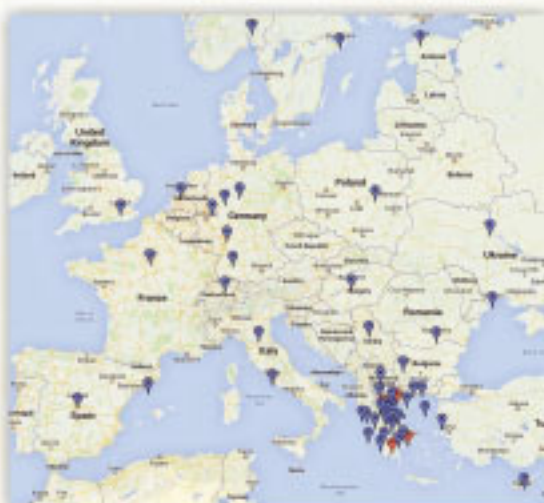

Suppliers

Suppliers' choice is always made with strict criteria. These include certified quality according to our requirements, insured long term coverage of our needs and local geographic characteristics.

*"The main target of the company's strategy is to establish and prove the statement made by "Pitenis" and by the Greek producers in general, that Greek products are of **high quality and high nutritional value**, providing great "value for money" to the consumer. The pure raw materials of the Greek land, combined with the drive for excellence, the know-how and the modern marketing techniques, create an unrivaled combination!"*

Dimitris Pitenis
CEO

Sales
Network
in Europe
and
USA-Canada

EXPORTS

Exports play the main role on the organizational culture of the company. Year by year, the company builds a very strong exporting profile. Export sales extend from European Union countries to USA, Canada and Russia, with an always increasing rate since 2004, peaking at years 2010-2014, as its showing on the diagram.

Rate of Increasing Export Sales for the years 2011 - 2014 and prediction for 2015

PRODUCT LINES

The company specializes in the production of gourmet delicacies, in four separate sections of the factory.

The main section is occupied with the production of traditional Greek dips like Tzatziki, Tarama Salad, Houmous, Chilly Feta Cheese Salad, Aubergine Salad, Agioritiki Salad, Russian Salad, Mayonnaise etc. Pickled products are produced on a separate section with main products being, the stuffed peppers with cheese, the sundried tomatoes and the traditional pickled cabbage leaves.

On the next section of the factory, the seafood delicacies are produced. The variety of products extends from shellfish and fish in oil, e.g. marinated anchovies, smoked mackerel, smoked herring, to the newest product line **OKEANOS EXCLUSIVE** which consists of highly gourmet products like smoked octopus, smoked eel, smoked salmon, smoked trout and **fish pastourma** (for a lighter pastourma experience!).

The last section of the factory deals with dressings and sauces like ketchup and mustard, in various flavors. It is in this section that we produce our new gourmet mustards based on Flower Honey, Extra Virgin Olive Oil and Balsamic vinegar.

WHY "PITENIS";

Capturing market's messages fast and at their early stages, Pitenis family invested on the combination **high quality - traditional taste**, using the most modern production techniques, achieving International certifications (ISO 22000:2005, HAACP, BRC, IFS, HALAL, FDA), and utilizing pure raw materials, 97% of which come from the Greek land.

Raw materials are being examined in our Laboratory before being accepted in the production process, ensuring their **quality, specifications** accordance and their **suitability**. It must be noted that a remarkable quantity of raw materials every year is being denied and returned to the supplier. Our efforts are being focused on substituting chemical substances and additives, which are broadly used in industrial Food production, with natural-healthy materials.

Since 2005, the company implements a **plan of cooperating with employees** for the production of **farming raw materials**. These materials are being farmed on their land with company's control, aiming at absolutely safe products that abide with company's specifications.

In the same direction (part of company's social policy), there were agreements that were being made with three farmer groups from West Macedonia Greece district (Kozani, Neapoli, Grevena) with the sole purpose of completely absorbing their farming production. The control expanded, in cooperation with certified local laboratories, to the examining of pesticides persistence and in the near future the certification of the farming land that is being used is planned.

The highly skilled workforce is the company's main strength. The organizational chart includes apart from the Production, Finance, Sales, Storage departments etc, an Exports department, a Marketing department, a certified Chemic Lab and a separate R&D department for the continuous improvement of the existing products and the development of new lines.

4

R & D and Innovation - Bio-functional products

Our extensive communication with consumers and the recognition of our products high quality, led to the decision to invest on new innovative products of **higher quality, assurance and nutritional value**.

Since 2004, company's R&D department started to focus on the development of **bio-functional** products. HHBT ("Hellenic Hepirus BioTechnology") was being founded, a company that specializes on Bio-Technology Research and Development in cooperation with prominent biologists. On February 2011, this research led to the company's second patent concerning a solution of **Krokus Kozanis** with **Extra Virgin Olive Oil**. This solution not only amplifies the Extra Virgin Olive Oil's healthy properties but adds a lot of the pharmaceutical properties of Krokus Kozani. Using this solution, the new patented "Pitenis Premium Quality" line was being created, consisting of 7 Dips, 3 dressings and a Bio-Functional Extra Virgin Olive Oil with Krokus.

Finally, the addition of **Extra Virgin Olive Oil** in almost all "shelf" company's products, distinguishes them from competition and makes them more attractive to the modern consumer not only in Greece but also abroad.

Krokos (Greek Saffron PDO Kozani, GR)

Krokos Kozanis (Saffron), a pure natural product of the Greek land, classifies amongst the best quality Saffron in the world. There are many traditionally accepted properties of krokos, like the aphrodisiac, the antiseptic of the oral cavity, the anticonvulsant or the digestive. It contributes to the well-being and the good health of the human system. It acts as an antioxidant and as an antithrombotic agent.

Nowadays, it is well known that the stigmas of krokos have strong antioxidant properties, protecting against the growth of free radicals. Recent studies converge to the conclusion that, it improves human brain function and especially memory, as well as blood circulation.

Extra Virgin Olive Oil (PDO Sitia, Crete GR)

ΕΡΟΤΟΚΡΙΤΟC with 22 Global Awards

In the Mediterranean diet, olive oil is the main constituent of good health and long living, being a very rich source of energy. Studies confirm olive oil's therapeutic action of against duodenal ulcer, by reducing the concentration of gastric fluids into the stomach. It also improves colon's function and helps in balancing good and bad cholesterol. The mono-unsaturated fats and the antioxidants that are part of olive oil's main constituents, help in the prevention of blocked blood arteries and reduce the risk of heart deceases or a new heart attack.

Nutritional & Lenten salads

TAHINI SALADS

... with natural antioxidants

Houmous :
a product that the
Ancient Greeks
used in their
everyday diet
as a Full Meal !

Houmous, or "Houmi", as properly called by the
Ancient Greeks, is the combination of sesame
with any other legume. It is a creamy salad
containing tahini (grinded sesame pulp),
one or more grinded legumes, lemon and garlic.

- The Ancient Greek soldiers always carried
sesame seeds, in order to give them the high
energy needed to cope with emergency
situations.

Combining legumes
with Tahini, you get the
same amount of proteins
as from red meat !
(... for more information ask for our
special 'TAHINI SALADS' leaflet)
